

## The BoatTrailInSail Survey

### The Trailer Sailer Boat Survey

A traditional survey is often inappropriate both in scope and cost for a small trailer sailer or day boat. So we have developed specialised pre-purchase surveys to assess the general condition of the boat and equipment.

The report details all items inspected and highlights defects and recommendations for rectification or further investigation. The report satisfies the requirements of the leading Finance and Insurance Companies.

- Identification of Vessel.
- External Hull. Hull Structure.
- Internal Structure and Stiffening.
- Internal Fit Out.
- Underwater Sections.
- Moisture Reference Readings.
- Keel, Ballast & Keel Fixings.
